The other was [Ex. 6 - Personal Privacy]...on 8 25 10 but I see it was dissolved and also identified as "provided water" so one or more of those pieces may be inaccurate.

Karen,  
I was going through our data and could only find the [Ex. 6 - Personal Privacy] as having arsenic hits. All but one was at or below the DWS. Where else did you see arsenic at levels of concern?

It's a foot thick with fold outs and color images. I have our document processing center working on it but it won't get done today. Where do you want me to send it to?
